

BaerCoil® Wire Thread Inserts

Inserts in Tape

We can supply many sizes in tape, too.
Please inquire prices and availability.

Wire Thread inserts - "without Tang"

Type: "free running" and type: "screw grip" - on inquiry

TwinCoil

The TwinCoil system consists of two BaerCoil inserts. An outer Coil installed into an oversize tapped hole which then has an inner Coil fitted inside to give a standard female thread. The outer insert is installed into the TwinCoil tapped hole (larger than a conventional wire thread insert tapped hole) and is the same nominal length as the original thread. The outer insert is always a "free running" type insert. The inner insert however can be either freerunning or screw grip dependant on the application.

Applications:

- to correct out-of-position holes
- to salvage wire thread insert holes that have become worn or stripped
- to correct tapped holes that gauge oversize
